

# Quick Start Guide

For Installers

## Initial Set Up

### Create an Account

Visit [controlmydehu.com](https://controlmydehu.com) to set up your account.

### Log in to the DryFi Dealer App

If you haven't downloaded the app yet, search for "DryFi Dealer" in the app store (Google Play or iOS).

### Set up the DryFi Devices

Remote Device: Plug into cat 5 Port of dehumidifier

Display Device: Place in an accessible location to view and plug into standard outlet.

### Register and Pair

Click "Add Device". Follow prompts to register the device, then pair Wi-Fi when prompted.

## Adding Homeowner Access

You have the option to give the homeowner access to view limited DryFi information by sending them an access code. Note that even with an access code, homeowners cannot change settings or control their dehumidifier.

**On the DryFi App:** View the dehumidifier you want to give access to on your Fleet. Click Owner Access, then choose how you would like to send the code.

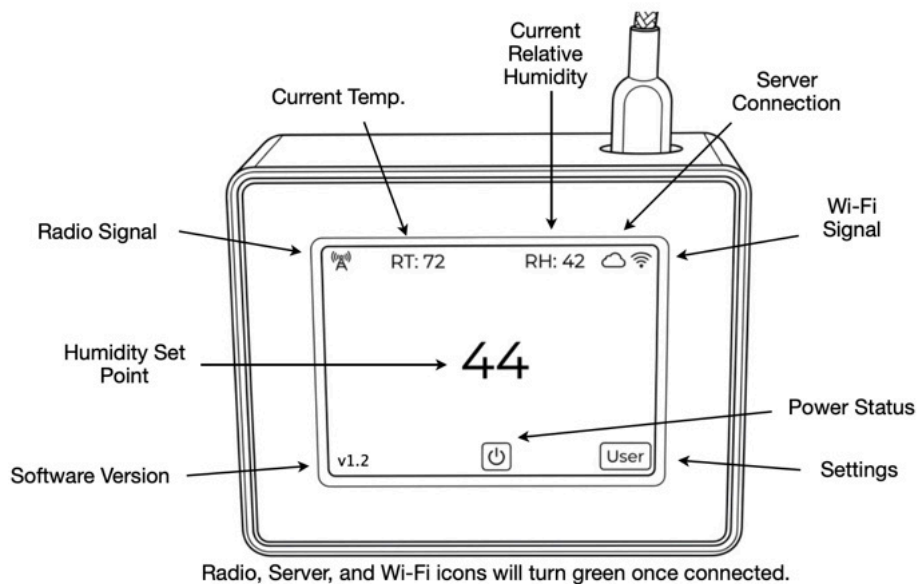

**On the Web Portal:** Find the dehumidifier you want to give access to on your Dashboard. Click Manage to the right side of the customer. Select Owner Access and copy code or send direct link.
