

Quick Start Guide

For Homeowners

Note: These instructions are designed for homeowners setting up their own monitoring. If you are working with an installer, this guide is not applicable.

Initial Set Up

Create an Account

Visit controlmydehu.com to set up your account.

Log in to the DryFi Dealer App

If you haven't downloaded the app yet, search for "DryFi Homeowner" in the app store (Google Play or iOS).

Set up the DryFi Devices

Remote Device: Plug into cat 5 Port of dehumidifier

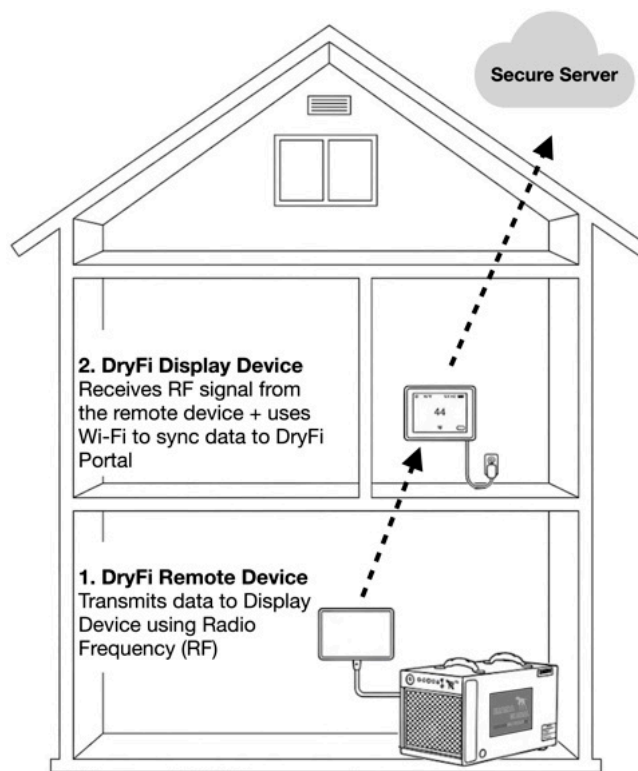

Display Device: Place in an accessible location to view and plug into standard outlet.

Register and Pair

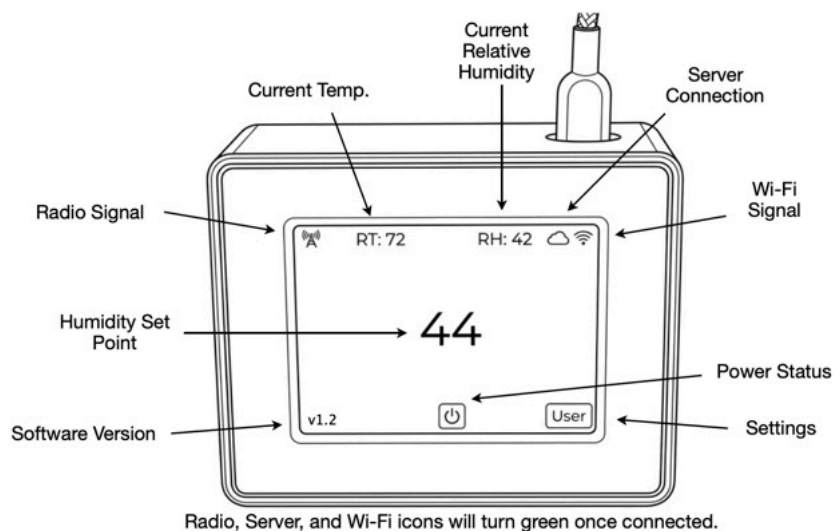

Click "Add Device". Follow prompts to register the device, then pair Wi-Fi when prompted.

How Does DryFi Work?

*DryFi Remote and DryFi Display are not to scale

Troubleshooting

Having trouble? As a first step, try a quick reset. Simply unplug your display, count to 10, and plug it back in. Give it about two minutes to power up and automatically reconnect to your network.

Problem	Solution
Display Screen is Completely Blank	<ul style="list-style-type: none">• Make sure device is securely plugged into wall outlet• Test the outlet to make sure it has power
Gray Wi-Fi Icon (Top Right)	<ul style="list-style-type: none">• Display Device has lost Wi-Fi connection. Check if Wi-Fi is working for other devices• If your home Wi-Fi is working, power cycle the DryFi display
Gray Antenna Icon (Top Left)	<ul style="list-style-type: none">• Display Device has lost connection with Remote Device in crawl space.• Check Cat5 cable is plugged in securely for Remote Device, then power cycle the DryFi• If there's still an issue, check the UUID on the display device (User, Remote UUID). Verify the numbers match.
Cloud Icon is Gray (but the Wi-Fi is Green)	<ul style="list-style-type: none">• Display Device is unable to connect with DryFi Servers. Wait 15 - 30 minutes to see if it's a temporary glitch.• If it is still gray contact your internet service provider or whoever set up your network router.
