

How to Pair Your DryFi Using the iOS or Android App

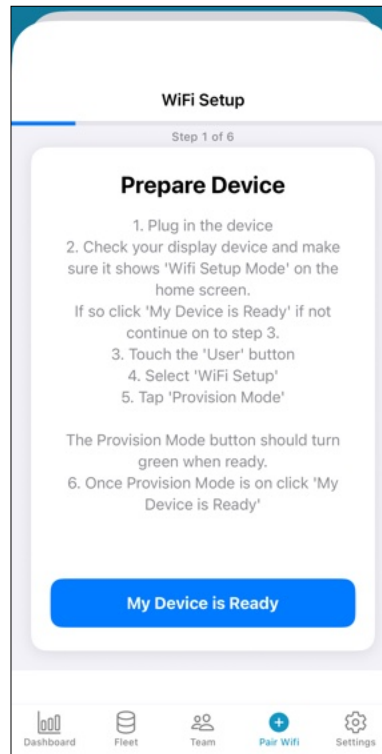

Note: Before you begin, you need to create an account on the DryFi Web Portal (www.controlmydehu.com).

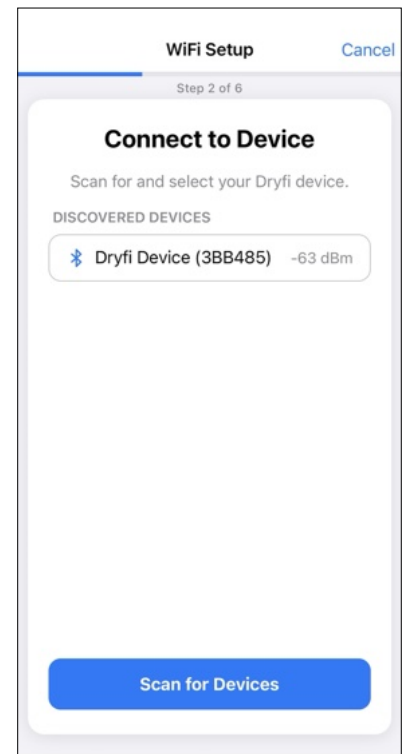

1. Search for DryFi Dealer in the iOS or Google Play Store. Download the app and log in.

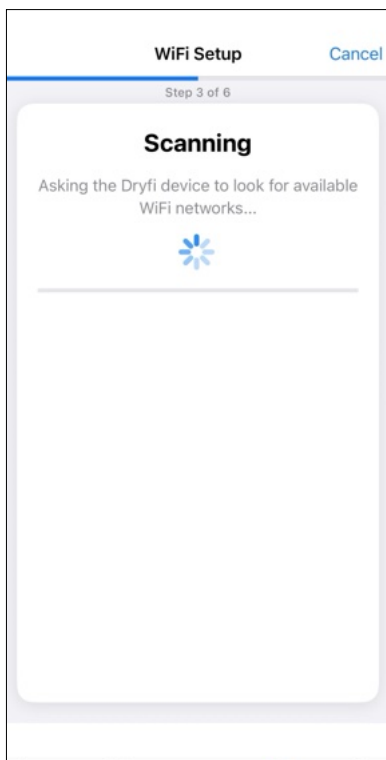

2. Click Add Device to complete device registration, then select Pair to Wifi Now when prompted.

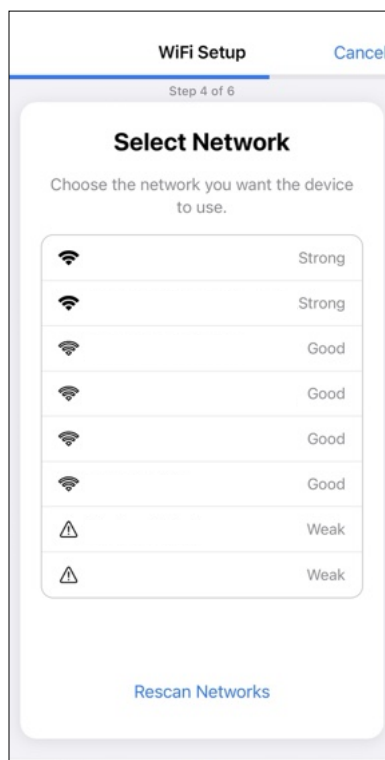

3. Follow the steps shown on screen, then select **My Device is Ready**.

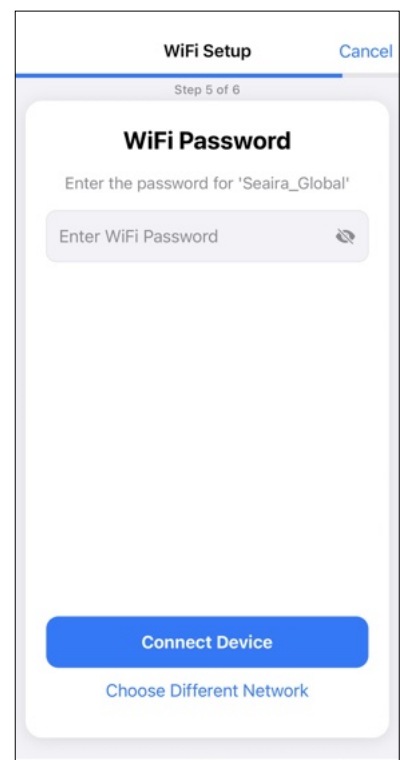

4. Select the DryFi Device with the matching last 6 digits of your Display UID, then click **Scan for Devices**.

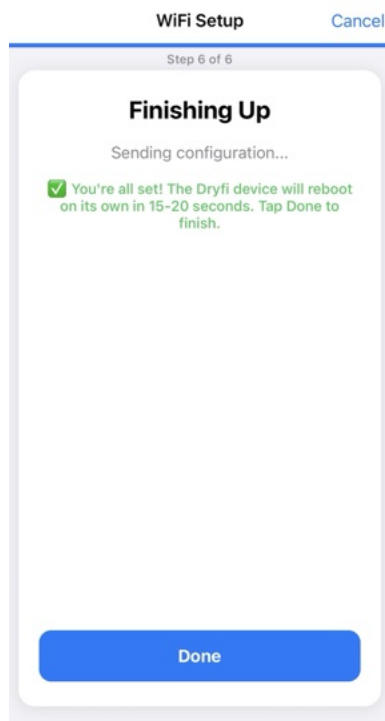

5. The app will automatically scan for nearby Wi-Fi networks.

6. Select your Wi-Fi Network.

7. Enter your Wi-Fi password, then click **Connect Device**.

8. The DryFi Device will reboot automatically to complete the process.
