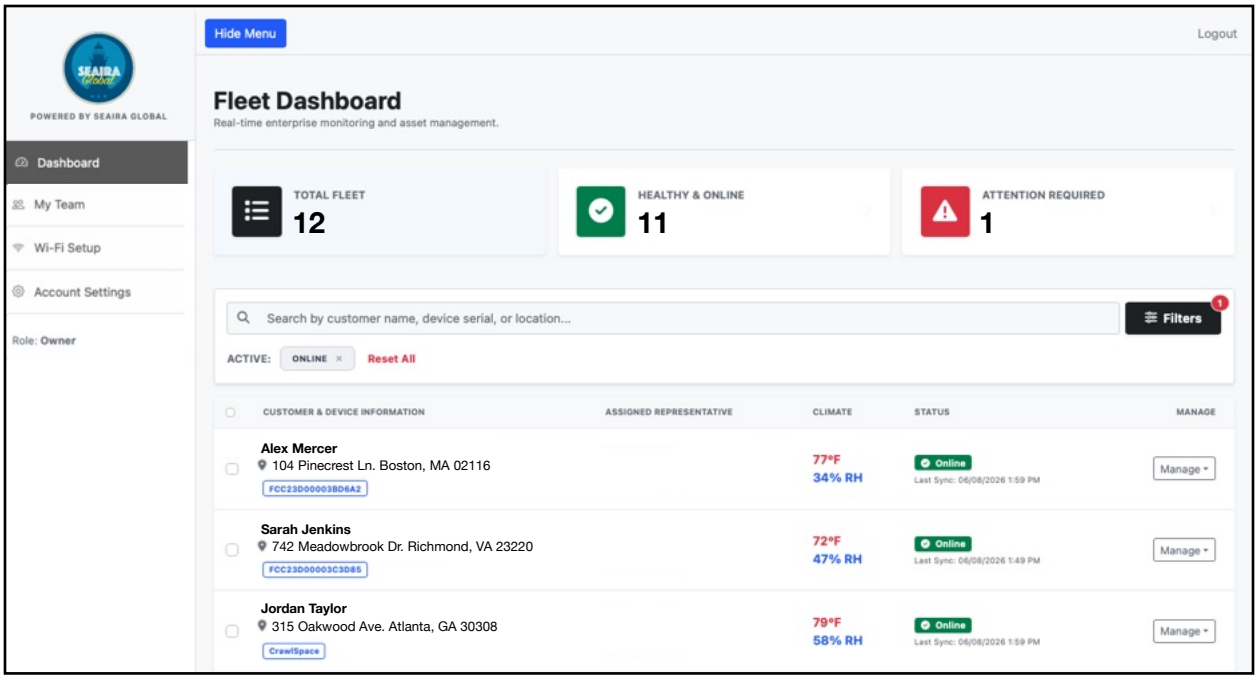
Navigating the DryFi Dashboard

Using the Web Portal

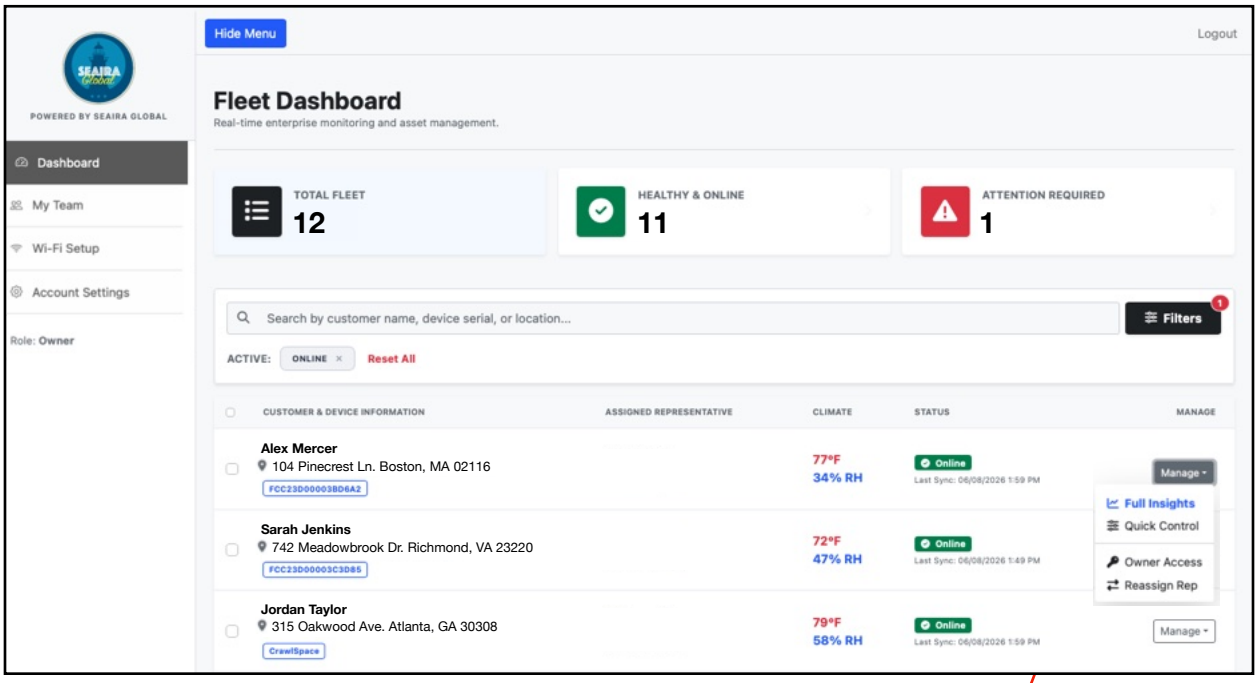
Fleet Dashboard

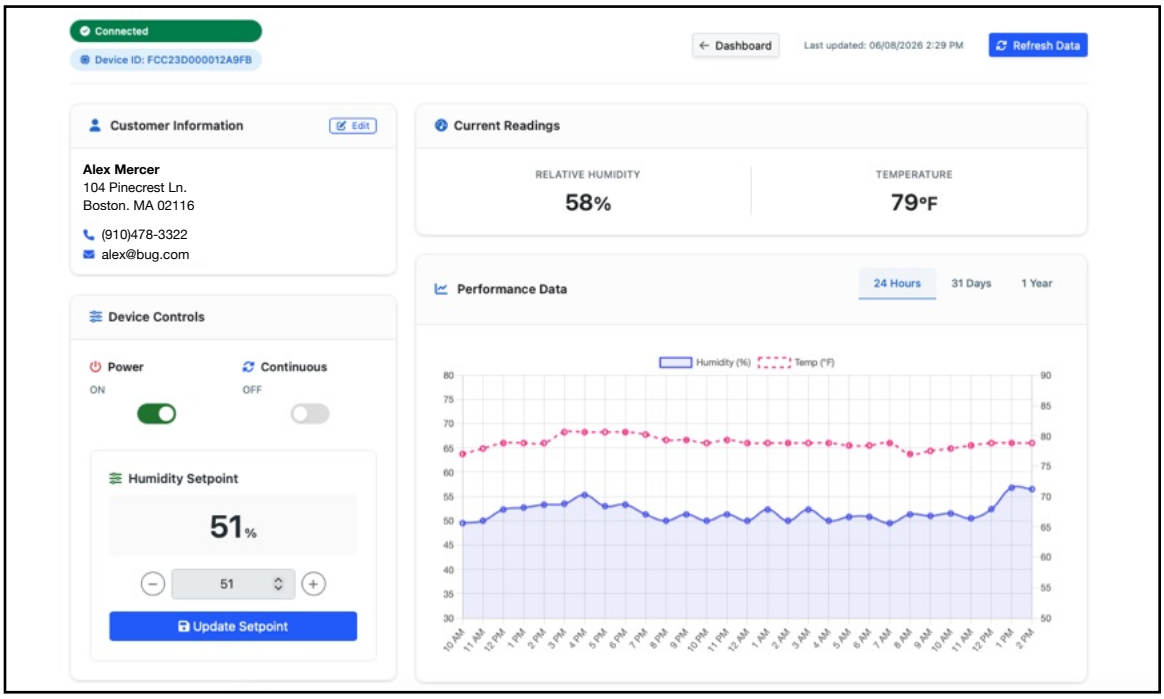
The dashboard screen gives you a high-level overview of your entire fleet of dehumidifiers. The top metric tiles provide an instant health summary of total, healthy, and attention required units. By using the built-in search and filtering tools, users can quickly find dehumidifiers based on customer name, device serial, or location.



Full Insights

For more information on a specific dehumidifier, or to change the settings, simply click on **Manage**, then **Full Insights**.

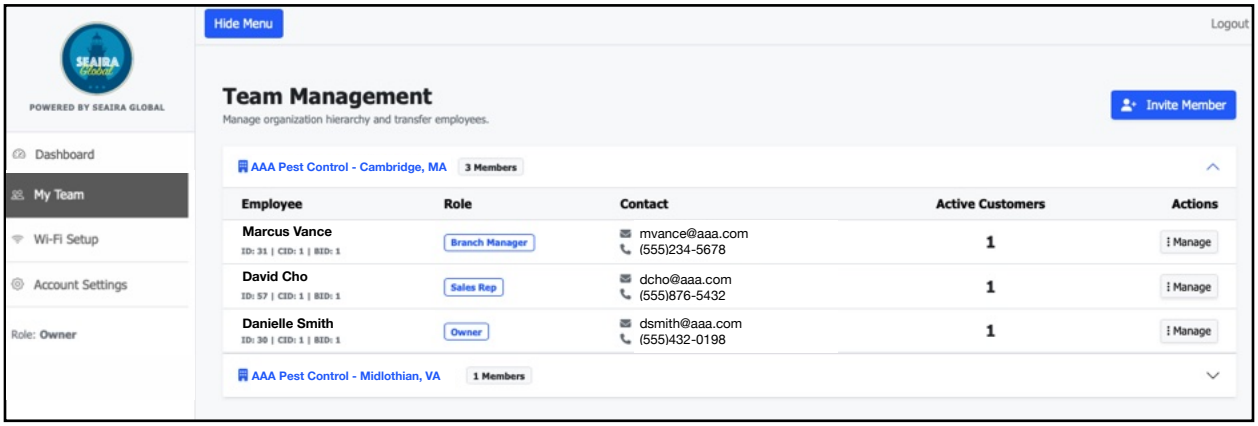




From the Full Insights page, you can view current readings, view historical data and control the device.

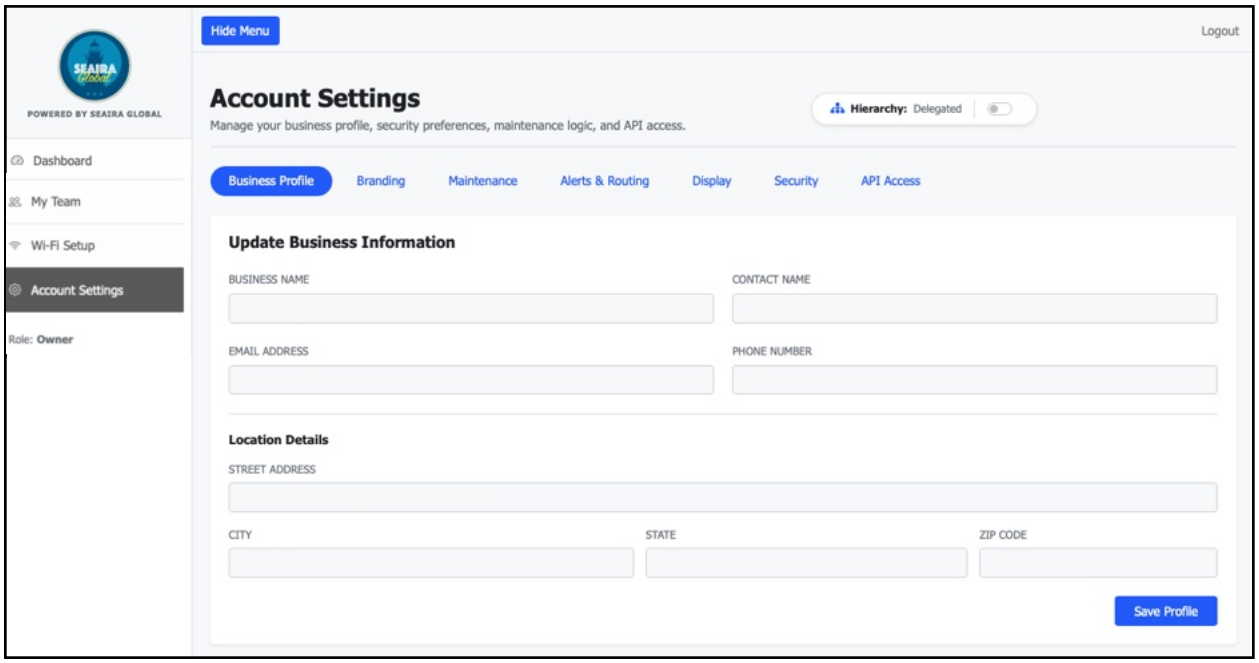
My Team

This screen gives you the option to invite, transfer, or terminate employees.



Account Settings

The Account Settings page allows administrators to manage company profiles, customize branding, establish alerts, and more.



1. The **Business Profile** tab allows you to update the company address and manage primary contact information.
2. The **Branding** tab allows you to upload your own corporate logo to replace the default Seaira Global logo in the upper-left corner.
3. The **Maintenance** tab lets you configure the frequency of automated maintenance reminders.
4. The **Alerts & Routing** tab allows you to customize when alerts are triggered and who receives them.
5. The **Display** tab lets you update regional preferences, including time zone, temperature metrics (Fahrenheit or Celsius) and date formats.
6. The **Security** tab allows users to securely reset their passwords.
7. The **API Access** tab allows organizations to set up and manage their own API integrations.
