

WatchDog Environmental Monitor

The WatchDog Environmental Monitor (P/N: W-111) provides a simple way to monitor the conditions in your crawl space or basement, in addition to the performance of your dehumidifier. Simply download the mobile app (1) on your phone and follow instructions on the app to plug the gateway into your wireless router (2), and mount the sensor with attached probe (3). You can even set up customized alerts* to be notified when the conditions are out of your desired range.

*Alerts require monthly fee after 3 month trial period
